Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

The drawing objection has been withdrawn in view of the proposed drawing filed 08/20/04. Applicant is requested to submit a formal drawing without the "replacement sheet" heading.

The objection to the specification has been withdrawn in view of the amendment filed 08/20/04.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for the air layer as originally filed. This is considered to be new matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lundquist (U.S. Patent No. 4,055,176)

Lundquist discloses a safety intravenous set having a spherical ball (51) . The drip chamber shown in fig. 1 and the double curved structure is considered to be either the external curves or the internal curves in the broadest interpretation. The hemispherical settling portion is considered to be the internal structure where the ball is drawn in phantom in fig. 1.

Response to Arguments

Applicant's arguments filed 08/20/04 have been fully considered but they are not persuasive. Applicant's arguments are directed at the functional language which the prior art is capable of performing. Lacking any structural distinguishing features, the prior art of record is being maintained. Further applicant has no support or disclosure for the air layer. Further applicant appears to be arguing more narrow than claimed with respect to the transparent barrier. Applicant is correct in describing the disclosure as to the parts which are quoted that are made of transparent and translucent material.

However, the upper body 13 is clearly shown as transparent by the hatch marks and the lower body is translucent. Merriam-Webster online dictionary (see - <http://www.m-w.com/cgi-bin/dictionary?book=Dictionary&va=translucent>) has defined translucent as transparent. As such, the Examiner is maintaining that the transparent barrier with the double curved structure is transparent. Further, another interpretation would be that the transparent barrier is made of transparent and translucent material which would encompass the scope of the claim.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
